---

January 22, 2021

Panther Family,

During the last week, the district continued to see an increase in COVID positive cases along with the number of High School employees needing to quarantine. With the Williamson County Health Department's recommendation and the district's operational and staffing needs, **Liberty Hill High School** will extend the 100% remote instruction for all students one more week, **effective Monday, January 25th through Friday, January 29th**. High School staff members will report to campus and work individually in their classrooms to teach remote students. **On-campus instruction will resume on Monday, February 1st**.

Before and after school extra-curricular activities will continue during this time following the district safety protocols. The Child Nutrition Department will have "Grab and Go" meals for breakfast and lunch available at the high school for students on the Free and Reduced program. Transportation is not provided. For more detailed information, please see the High School websites.

Liberty Hill ISD remains focused on meeting the instructional needs and ensuring the academic success of all students. We will evaluate moving campuses to remote instruction on a case-by-case basis. The decisions made when the district contact tracing of positive COVID-19 cases results in a lack of sufficient personnel to maintain campus instruction and operation. We will also continue to work with Williamson County Public Health and our Health Services team when making any decisions related to COVID-19.

Thank you for your support as we continue to work together in these unprecedented times.

A handwritten signature in black ink that reads "Steven Snell".

Steven Snell  
Superintendent, Liberty Hill ISD
